Final Practical Review

7

Overview

There are 3 different type of lab days:

Instructional day: Come in and be a sponge. The goal is to become familiar with the tools and techniques of that given day.

Practice Practical/ Exam: You're in groups. You have to assess and manage scenarios as a team. Once everyone is done, we'll take the multiple choice exam. Credit for the practice practical is given for participation. You will not be able to use your pt assessment skill sheets during these scenarios. 6 points based on effort per scenario will be awarded (18 points total). If a critical fail was hit on the scenario, then the group will receive 0 points. Once complete, the 50 multiple choice question exam will be given (100 points)

Practical Day: You'll be given three scenarios that were similar to the previous lab. Credit is based on performance.

General tips to succeed in this course

1. Find a study buddy. At least one. Have weekly check-ins with them. When you put yourself in the shoes of the proctor, you learn what we look for.
2. The key to minimizing anxiety during practical exams is by simulating stress during practice. The easiest way to do that is by timing yourself. Most of our practical scenarios are completed within 12 minutes. "Performance parallels preparation" ~David Acosta Jr.
3. Stay on top of the material via MyBradyLab and our Youtube Videos. It's not the difficulty of the material that stifles people, it's the *amount* of material that's overwhelming. Once you fall below an 80%, you're in a hole.
 - a. It is your job to climb out of that hole faster than we bury you.
4. Utilize MyBradyLab **pretest** and **posttest** quizzes to expose yourself to as many similar questions as possible before the multiple choice exams in class. These do not count for credit. If you cannot explain why something is right, purposefully get it wrong so you're provided with an explanation
5. For scantrons, place a dot next to each question that was difficult
 - a. Go deeper: Place dots on top of each letter you were weighing as potentially correct. This will allow you to effectively review your exams upon their return
6. A list of **mentors** you can reach out to: 🏠 **Mentors for Chicago EMT Training**

Final Practical Review

"The job's not done"

📅 Final Practical Review

📺 Final Boss | EMT Scenario

📺 Burn Victim Involved in Car Fire and MVC | EMT Final Boss

📺 Dispatched to the Nightclub for the Altercation | EMT Final Boss

📺 You Are Dispatched For The Fall ft. Sarah and Rowanne

📺 Dispatched to the Fall at the Music Festival ft. Dawson [EMT Final Boss]

Final Exam (may flip with Final Practical depending on instructor staff availability)

- 100 multiple choice questions (200 points)
- Guest speakers from employers

Be prepared to submit your legal name and SSN

Final Practical

- Scenarios that include both medical and trauma concepts
- Examples:
 - MVC caused by a driver experiencing a seizure
 - ETOH patient that experienced a dog bite
 - Heat stroke patient that fell off roof
 - Respiratory distress after jumping out of burning building
 - Drowning victim that was bit by a shark
 - Stroke patient that fell down stairs
 - OB patient who was a victim of abuse
 - Behavioral patient in altercation
 - GSW victim with respiratory distress
 - Electrical burn patient while that fell off of a ladder
 - Respiratory distress and hemorrhaging from blast injuries

Required deliverables by final day

- [ICS 100](#) and [200](#) ([700](#) and [800](#) are 5 points Extra Credit)
- Clinical Reflection Paper (60 points)
 - 3 pages double spaced
 - Reflect on your experiences on the ambulance as well as in the hospital
- Reflection paper on EMS article (10 points extra credit)
 - 1.5 pages double spaced reflecting on the EMS article
- Clinical PCRs are due **one week** after each clinical. *Not* on the last day.
- Come in uniform for class pictures 😊

Instructions for NREMT:

- Sign up and pass the NREMT at [NREMT.org](https://www.nremt.org)
- Complete this form to get your IL license:
<https://form.jotform.com/251085329838061>

Advice for seeking a job:

-
- Most of your difficulties will come from the fact that you are surrounded by people who are not as determined as you are. When you get lost, learn to turn back. When you get lost, learn to turn back. When the darkness is a new path. When the darkness is a new path, learn to kill the light. Learn to look through the eyes of others. Every act of adversity can lead to a broader set of skills. The rewards for perseverance are always waiting just on the other side of what we think is impossible.
1. Identify priorities and interests
 2. From your clinical rotations, did you prefer to be in an ambulance or within the ED?
 3. For ambulance companies, identify:
 - a. Proximity to your home
 - b. Hourly Rate and Benefits
 - c. Contracts they serve (hospital groups, nursing homes, etc)
 - d. Room for growth
 - e. Culture
 - f. Help with paramedic school?
